EXPERIENCE

Senior Software Engineer III · GeekyAnts, Bengaluru | Oct 2021 – Present

Mobile Engineer with 5+ years leading React Native, and Next.js initiatives for clients ranging from US restaurant chains to Indian super-apps. Specialist in brownfield optimization, design systems, and end-to-end delivery across ecosystems reaching 500M+ users. Selected client projects below.

Ajio — React Native Mobile Engineer

India's 2nd largest fashion e-commerce | 2026

- Cut crash rate by **~2pp (96.2% → 98.1%)**, eliminating **~2,100 weekly crashes** during high-traffic sale events
- Migrated brownfield iOS/Android apps to React Native New Architecture; reduced cold start by **~20%**.
- Shipped Glass UI design system on **10K+ item lists**, maintaining **55–60 FPS** scroll performance.
- Cut screen load time **25%** and redundant API calls **50%** via request deduplication, response caching, and FlatList virtualization

MyJobDrop — Mobile and Web Engineer

Belgian Job Portal | 2026

- Built full-stack job portal serving **100+** companies and **1,000+** professionals across Belgium.
- Delivered React Native, Flutter, Next.js, and FastAPI backend end-to-end in a 3-person team.

Talenzap — Mobile Lead

Skills Contest App (India) | 2026

- Hardened video-first social app for production; platform now hosts **500+ studios** and **50+** competitions.
- Authored expo-video-cache npm package (**300+** weekly downloads) to solve offline video caching.
- Cleared P0 blockers to enable launch for 1,000+ early users.

Trovey — Mobile Lead

Australian Travel & Itinerary App | 2025 – 2026

- Led architecture for 7+ engineer travel app (Expo SDK 54): OTA updates, background tasks, localization, theming
- Built a custom React Native renderer using **Konva-style** immediate-mode drawing for complex view layers, since no existing library met performance requirements

Jio Design System — Mobile Developer

Design System Powering 10+ Apps | 2025

- Core contributor to design system used across Jio ecosystem apps (**500M+** combined downloads)
- Cut iOS pod size **50%** by removing dead code and redundant dependencies.
- Reduced UI bug reports **~40%** through stricter design tokens and component-level fixes

Alarmas — Tech Lead

Fleet Tracking App (Paraguay) | 2025

- Led 5-person team (3 frontend, 1 QA, 1 backend) building GPS fleet tracking for **50,000+** users.
- Implemented C++ JSI map clustering engine rendering **1,000+ concurrent devices at 60 FPS with zero crashes**.
- Case study: monisankarnath.dev/case-studies/react-native-gps-map-scaling-performance

Synchronoss — Swift Developer

iOS In-App Purchase SDK | 2024

- Built Swift native IAP SDK on StoreKit 2 with **85%+ XCTest coverage** and Xcode Cloud CI/TestFlight pipeline.
- Published to Swift Package Index; SDK now integrated across all client iOS apps.
- Synchronoss serves **11M+ cloud subscribers** and **\$2B+ revenue globally**.

Figma → HTML Email Plugin (Internal Tool) — TS developer

Figma Email Template conversion to HTML email | 2024

- Built Figma plugin (TypeScript) converting designs to SendGrid-compatible email templates with 95%+ visual accuracy.
- Designed recursive node-traversal algorithm handling absolute positioning and overlapping nodes.

Darden Restaurants — Mobile and Web Developer

US Restaurant Chain | 2022 – 2024

- Built reservation and MSAL auth modules for Nx monorepo serving **11 brands (\$13.2B sales, 2,200+ locations)**.
- Cut auth defects **~40%** by standardizing flows across React Native and Next.js apps.
- Owned location search, menu, order tracking, curbside, and waitlist features.

OPEN SOURCE

expo-video-cache — Author and maintainer. Efficient video caching for Expo / React Native apps; **300+ weekly npm downloads**, shipped in production. npmjs.com/package/expo-video-cache

ioslapStore — Author. In App Purchase using StoreKit 2. swiftpackageindex.com/nathMonisankar/IOS-IAP-store.

SKILLS

Languages TypeScript, Swift, Java, Python

Mobile React Native, Expo, Swift, SwiftUI

Web React, Next.js

Backend & Infra Node.js, NestJS, FastAPI, PostgreSQL, AWS (ECS, SQS, RDS, VPC), Terraform, Firebase, Supabase

Tools Nx, Figma, Xcode Cloud, Azure DevOps

EARLIER EXPERIENCE

Software Engineer · Wipro · Oracle DBMS, SQL / PL-SQL 2020 – 2021

AWARDS & EDUCATION

Tech Innovator Award, GeekyAnts — geospatial map performance optimization (Alarmas).

Impact Contributor Award, GeekyAnts — open-source *expo-video-cache*.

B.Tech, Electronics & Communication Engineering · CGPA 8.33 2020
