## PROFESSIONAL SUMMARY

Senior Software Engineer with 5+ years of experience building scalable cross-platform, web, and full-stack applications used by 500M+ users across enterprise ecosystems. Strong frontend focus with React Native, React, Next.js, and Swift/SwiftUI, backed by hands-on backend experience using NestJS and Supabase. Led delivery of high-impact products including mobile apps with 50K+ downloads, CI/CD pipelines achieving 85%+ test coverage, and design systems adopted across multiple large-scale apps. Open-source contributor recognized for improving developer experience and performance.

## WORK EXPERIENCE

### Senior Software Engineer II – GeekyAnts | Bengaluru, India | Oct 2024 – Present

- Led end-to-end development of a React Native (Expo) vehicle fleet tracking app, reaching 50,000+ downloads on App Store and Play Store.
- Owned the full product lifecycle including estimation, sprint planning, architecture reviews, releases, and client demos.
- Designed and shipped an iOS payment SDK using Swift/SwiftUI and StoreKit2, supporting purchase, upgrade, downgrade, cancel, and refund flows.
- Published the SDK to Swift Package Index and implemented Xcode Cloud CI/CD, achieving 85%+ test coverage with XCTest.
- Core contributor to the Jio SwiftUI Design System used across MyJio (500M+ downloads) and 10+ apps, reducing pod size by 50% and UI bugs by 40%.
- Mentored engineers and collaborated with product and design teams to deliver scalable, future-proof components.

### Senior Software Engineer – GeekyAnts | Bengaluru, India | Oct 2023 – Oct 2024

- Built and enhanced a Figma plugin that converts email template designs into production-ready HTML with instant previews.
- Designed layout-generation algorithms achieving ~95% design accuracy and eliminating manual QA effort.
- Integrated AI-based image alt-text generation, improving accessibility and SEO compliance.
- Led authentication development for the Darden Restaurants monorepo (React Native, Next.js, React), serving 10+ brands under a \$11B+ enterprise.
- Implemented secure MSAL authentication flows, reducing auth-related issues by 40% and improving reliability.
- Drove Agile practices, enabling 20% faster feature delivery and 15% fewer post-release defects.

### **Software Engineer III – GeekyAnts | Bengaluru, India | Oct 2022 – Oct 2023**

- Led a development track focused on performance optimization and minimizing API calls.
- Resolved critical production issues, improving system stability and user experience.

### **Software Engineer – GeekyAnts | Bengaluru, India | Oct 2021 – Oct 2022**

- Developed interactive map-based features with smooth animations and location-aware behaviors.
- Improved map performance and overall UX across cross-platform applications.

### **Associate Consultant – Wipro | Bengaluru, India | Sep 2020 – Aug 2021**

- Developed PL/SQL scripts, procedures, and packages for Oracle HRMS alerts and reporting systems.

## **OPEN SOURCE CONTRIBUTIONS**

- Author and maintainer of expo-video-cache (npm), enabling efficient video caching for Expo/React Native applications.
- Added a feature in react-native-azure-auth(msal), a parameter authority url for authorize method in case the user wants to use a different url for login/signup/reset-password.

## **SKILLS**

Languages & Frameworks: TypeScript, JavaScript, React, React Native, Next.js, Swift, SwiftUI, NestJS, Node.js

Backend & Databases: Supabase, REST APIs

Tools & Platforms: Git, Xcode Cloud, Azure, App Center, SonarQube, Figma, Vercel, Netlify

Soft Skills: Technical leadership, mentorship, communication, problem-solving

## **EDUCATION**

Bachelor of Technology in Electronics and Communication Engineering  
Kaziranga University, Assam | 2020 | CGPA: 8.33
